21 July 1964

MEMORANDUM FOR THE RECORD

SUBJECT: Titler for 115A Camera System (P-E Type I)

25X1A

1. [redacted] had requested that, as a member of EB 1492 CCB, I raise the issue of inter-frame titling for the P-E Type I OXCART Camera. Inadvertently, I had not discussed it at the CCB Meeting. In following up the action, cable [redacted] 459 (IN 83961) dated 18 June 1964 was drawn to my attention.

25X1A

2. I subsequently talked to [redacted] Special Security Office, and [redacted] NPIC. They informed me that several meetings have been held on the titling. The present status is as follows:

a. NPIC is working up proposed titling formats, which they plan on coordinating with E-K, prior to presentation to 1492 CCB, for production of necessary mods to titler.

25X1A

b. [redacted] of NRO staff is aware of problems; he sat in on early meetings.

25X1A

c. [redacted] has been in on some of the preliminary sessions.

25X1A

d. [redacted] is unhappy about not marking classification on each frame, but is willing to go along if nothing else can be done.

e. I will await NPIC action before proceeding. It may be desirable to officially get the 1492 contract involved now, but, for time being, I will wait.

25X1A

25X1A

Atts: 1. Copy of [redacted] 2459
2. Copy of cable written but not sent.
